

# E-Z Tilt by AZTECH

## Large Roll Lift & Tilt System

### STEP #1

- Maneuver directly over roll and lower core boom into roll.

### STEP #2

- Fasten roll boom to core with a few easy turns.

### STEP #3

- Lift roll by turning lift handle.

### STEP #4

- Release retaining pin and turn handle.

### STEP #5

- Vertical roll now ready for use.

The AzTech E-Z Tilt 600 Large Roll Tilt System, capable of lifting and tilting rolls up to 600 lbs., is a simple, inexpensive and effortless solution for lifting and tilting large and heavy roll products. Simply lower the 3-Inch Diameter Core boom into the roll core, lock into place, lift and tilt. Conversely, rolls are just as easily stored in horizontal position by reversing the procedure. The E-Z Tilt, with its robust all-steel construction and fully mechanical design, is an invaluable product that will provide your company years of safe and dependable service.
